

**Just three weeks !!**

**“FMEMS”**

At first I'd like to thank Mrs. Iris Wilters for every thing that she made for me , she is really helpful and friendly. When i started to apply for this course , i needed many information and had a lot of questions and have sent a lot of emails to her so i was very annoying person but she had answered all of my questions and my emails and before we came to Wilhelmshaven, she sent a pdf file with all information which we needed there and she was always in contact with us. She gave me information to about study in Jade Hochschule because I want to make my master study in Germany so it was really important for me.

I want to thank too everybody in international office " Lars , Levente , Sophie , Catharina" who were always with us and tried to make our stay in Wilhelmshaven comfortable and funny. When I arrived I found Levente and Lars were waiting for us . They gave us the keys of rooms and told us where everyone would be then we started to play mini Golf in front of the boat , they were really so friendly and funny after that we knew Sophie and Catharina . All of them were helpful and they made excited program for us to make us know more about Wilhelmshaven.

All teaching staff were really so good and I'm proud because they have taught me and I had learnt a lot from them so I have to thank all of them.

I can't say anything about my colleagues because we weren't just colleagues , we were really family they are amazing people and I'm really happy to know them and now I have friends in many countries.

Wilhelmshaven is the calmest and best city i've ever seen. For many people it's boring city but for me it's best city for studing it's calm and quiet and people there are very helpful because of that I see it's suitable city for studing. Actually I see too it's so suitable for any holidays if anyone want to have some relaxing days Wilhelmshaven is a good choice and I hope I come back again to Wilhelmshaven I like this mood in Wilhelmshaven and I miss it so much.

International office made really so good program for weekend like visiting Hamburg (the "Löwenstein" company), Bremen , Papenburg "Meyer Werft" , Greetsiel . That were so excited excursions . I spent amazing time there and our staying in Hamburg was really comfortable. We visited a lot of attractive places and I have known a lot of exciting information about every city which we visited so I had happy weekends.

This course has a big effect on me because i want to make my Master studies in Germany so it was so good opportunity for me to know more about how the study in Germany looks like because I read a lot before about studing in Germany but it's different experience when you live and have direct contact in studing mood in Germany so for me it was great experience so I hope to take chance to have my master in Germany. This course gave me too chance to have contact with German culture and I'm so happy , I've started to learn German 2 years ago because I like German culture and it was so great chance to see it in reality.

I didn't have just chance to know more about German culture I knew a lot about many cultures because we were many students come from around 15 countries so actually I lived in Germany with 15 countries and 15 different cultures around me so it was an exciting 3 weeks in my life.
