INTERNATIONAL MARITIME MANAGEMENT

JADE UNIVERSITY
OF APPLIED SCIENCES
Wilhelmshaven Oldenburg Elsfleth

High flexibility

STUDY CONCEPT

INTERNATIONAL MARITIME MANAGEMENT

... lets you choose how many learning modules you want to study each semester. You are also welcome to interrupt your studies should professional and/or private duties prevail. Most students study **five semesters part time** to complete their IMM studies.

... is mainly based on **distance learning** which means most modules are completed by handing in home assignments. Attendance phases are reduced to a minimum and can be organized flexibly.

... follows a **learner-centred approach** which means that you acquire theoretical knowledge by means of course books. These didactically prepared texts enable you to combine existing professional knowledge with new academic knowledge. For this purpose, **real-life projects** and cases arising from your own professional contexts are processed and solved; **theoretical and practical issues go 'hand-in-hand'**. During the learning process you will apply new methods and exchange ideas with your peers by means of student forums. Guidance/support is provided by us – your lecturers.

Get professional competencies cross-credited

RECOGNITION OF COMPETENCIES

RECOGNITION

Do you work in a junior management position in the maritime industry at sea or ashore and have you already gained professional experience and individual key qualifications?

Have you already passed examinations and gained credits at another university on an equal level?

The Jade University recognizes existing skills and prior learning and you do not have to re-study the same thing. As a result the duration and cost of your studies can be reduced.

What can be recognised?

1. Achievements at another university.
2. Competences acquired during your professional career.
 - General recognition: On submission of the Certificate of Competency as a first nautical officer according to the STCW, you receive credit for the module 'Human Factors in Shipping'.
 - Individual recognition: On submission of a portfolio proving your competences, you can receive credit for the requested module.
