

VORTRAGSREIHE: KOLLOQUIUM ZUR WIRTSCHAFTSINFORMATIK

COMPUTER APPLICATIONS RELATED TO DISABILITY AND ACCESSIBILITY

PROF. IVANA HARARI - NATIONAL UNIVERSITY OF LA PLATA / ARGENTINA

16. Januar, 10:15 Uhr

Raum H303

Prof. Ivana Harari will provide an overview of applied research projects as well as student projects related to the development of software and embedded systems for people with disabilities. Target groups include, for example blind people, deaf people, or people with autism. She will provide recommendations for user interface design, study the UX impact of different applications, and highlight development issues that have arisen during the different projects.

Prof. Ivana Harari is Professor and Director of the Accessibility Area at the Faculty of Informatics at the National University of La Plata in Argentina. Furthermore, she is member of the „Laboratory for the Research of New Informatics Technologies“ (LINTI) at her University.
